## **MTM Power's New Representative for Switzerland**

This year MTM Power wants to further increase its worldwide export business. The winning of Precimation AG as a new representative for Switzerland lays the necessary foundations for raising the export share of the turnover in 2017.

Precimation has a unique product portfolio connection systems and components and its linecard includes more than 25 of the most effective manufacturers worldwide. As a leading company for connection systems and components in the fields of industrial electronics, telecommunications, rail and defence technology, aviation and space travel, Precimation can draw on a solid base of professional knowledge and many years of experience. Various custom-made services include design-in solutions as well as other value added services to meet customer's needs, for instance in the areas of logistics or product enhancement.

Precimation works together with the most efficient and market-leading manufacturers in the world and offers the best quality, maximum flexibility and a fair pricing policy on all its products. For expanding its product range by standard and customised power supply solutions, MTM Power is the ideal partner for Precimation.

Both companies look forward to a good and successful cooperation.

Mellenbach, März 2017/03
