

## Eurotech Announces ReliaGATE 10-14 Compact Multi-Service IoT Edge Gateway

**Amaro (Italy), October 29<sup>th</sup>, 2019** – Eurotech, a leading provider of embedded systems, platforms and Internet of Things (IoT) solutions, today expands its offering by announcing a new Multi-service IoT Edge Gateway, the [ReliaGATE 10-14](#), featuring LTE connectivity for industrial and lightly rugged applications.

The ReliaGATE 10-14 is the natural evolution of the [ReliaGATE 10-12](#) that now embeds a more powerful core bringing more computational capabilities and memory. With this evolution addressing the more and more demanding [industrial-grade IoT applications](#) will be easier and faster. An extra feature such as the video output capability is also available.

The ReliaGATE 10-14 has a very compact mechanical enclosure with a small profile, suited to be installed on DIN rails, reducing both the cost of installation and the mounting space required, allowing an easy retrofit in existing cabinets and other type of applications.

Given the focus on end-to-end security for the deployment of IoT services, the ReliaGATE-10-14 is designed to meet the new cybersecurity standards set by IEC 62443-4-1/2 including an anti-tamper mechanism to detect and report unauthorized access to the device, secure boot and the TPM 2.0 for secure storage and device identification.

An input power monitoring technology will allow to check regular operative conditions and detect operation anomalies, facilitating preemptive maintenance and further enhancing the device security.

The ReliaGATE 10-14 will be compatible with existing modules extending the gateways capability and bringing to the customers extra features:

- [ReliaIO 10-12](#), an I/O expansion module
- [ReliaLORA 10-12](#), a LoRa gateway module

“The new ReliaGATE 10-14 is moving along the way established by the successful ReliaGATE 10-12 for industrial and lightly rugged applications,” said Massimiliano Marrone, Eurotech’s Boards & Systems Product Manager. “It delivers more performance, installation flexibility and more functionalities including connectivity options and end-to-end security features, for the secure deployment of IoT services globally.”

The ReliaGATE 10-14 will be available in Q2 2020.

### **About Eurotech**

Eurotech (ETH:IM) is a multinational company that designs, develops and supplies Edge Computers and Internet of Things (IoT) solutions – complete with services, software and hardware – to system integrators and enterprises. By adopting Eurotech solutions, customers have access to IoT building blocks and software platforms, to Edge Gateway to enable asset monitoring and to High Performance Edge Computers (HPEC) conceived also for Artificial Intelligence (AI) applications. To offer increasingly complete solutions, Eurotech has activated partnerships with leading companies in their field of action, thus creating a global ecosystem that allows it to create "best in class" solutions for the Industrial Internet of Things.
