LEROY AUTOMATION

## ON-BOARD TRAIN MONITORING SYSTEMS (TMS) AND TRAIN CONTROL SYSTEMS (TCS)

Toulouse, France – September 10<sup>th</sup>, 2019

LEROY AUTOMATION, a global leader and manufacturer of reliable rail automation components and on-board train control and monitoring systems (TCMS) architect, will demonstrate its cutting-edge EN 50155-compliant products and high-end safety critical solutions at Railway Interchange (RI) 2019.

This is the largest railway exhibition and technical conference in North America. LEROY AUTOMATION looks forward to seeing you on September 22-25, 2019 at the Minneapolis Convention Center, Minneapolis, Minnesota, USA.

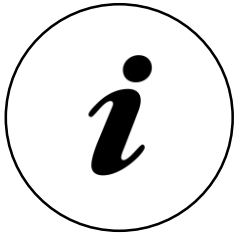

LEROY AUTOMATION's international business development team will display SIL0 and SIL2-certified railway products at their booth #4719 located in RSSI (Railway Systems Suppliers, Inc.) hall.

During this RI 2019 edition, LEROY AUTOMATION will highlight its involvement in major North American projects:

- AMTRAK's next-generation of high-speed rail for the northeast corridor ;
- NYCT R-211 modernized traction control system.

Furthermore, we will introduce LEROY's rail control solutions and fail-safe SIL2 products and provide our feedback about CENELEC EN 50126/EN 50128/EN 50129 standards at the RSSI Innovation Theater on Sept. 23rd – 30' Speech starting at 01:30PM.

## ABOUT LEROY AUTOMATION

---

LEROY AUTOMATION is a company headquartered in Toulouse with a North American subsidiary located in Montreal.

For 35+ years, LEROY AUTOMATION has been designing, manufacturing and marketing automation products and embedded electronic equipment for on-board rolling stock vehicles, automation solutions for electrification networks, and railway control systems.

Especially designed for harsh conditions, the company's products are suited for demanding electromagnetic and extreme thermal, as well as for high vibration operating environments.

From feasibility studies, detailed engineering and design, to maintenance and repair services, LEROY AUTOMATION collaborates with its worldwide customers during the complete life cycle of their products and systems.

For several decades, LEROY AUTOMATION has cooperated with **ALSTOM, BOMBARDIER, CRRC, SIEMENS, THALES**, and others in international project and product developments along with railway and mass transit authorities, industrial and military customers, system integrators and OEMs worldwide.
